

# Robot EOAT

## Features

- **Lightweight, Compact, and Robust:** End-of-Arm Tooling prioritizes a lightweight, compact, and robust design for optimal performance.
- **Patent-Pending Electric Grippers:** The electric gripper system, with a patent-pending design, offers 500 lb of grip force, operating like a pneumatic cylinder without needing pneumatic controls.

## Customize

- **Tailored Automation Solutions:** Givens specializes in custom EOAT solutions, providing gripper jaws and complete end-effectors with tilts or rotations.
- **Experience in Custom EOAT:** Vast experience, designing custom EOAT capable of gripping various part configurations.

## Versatility

- **Pneumatic and Electric Options:** Versatile EOAT, including pneumatic, electric, magnetic, and vacuum cup lifting.
- **Gripper Assemblies Variety:** Pneumatic gripping EOAT offers a line of lightweight pneumatic gripper assemblies in various sizes, strokes, and capacities.
- **Sensing and Inspection Solutions:** Comprehensive sensing options, from proximity sensors to full-color vision systems, for versatile part sensing and inspection.
